

Instructions

1. Copy the appropriate cemon.*.exe file to your device.

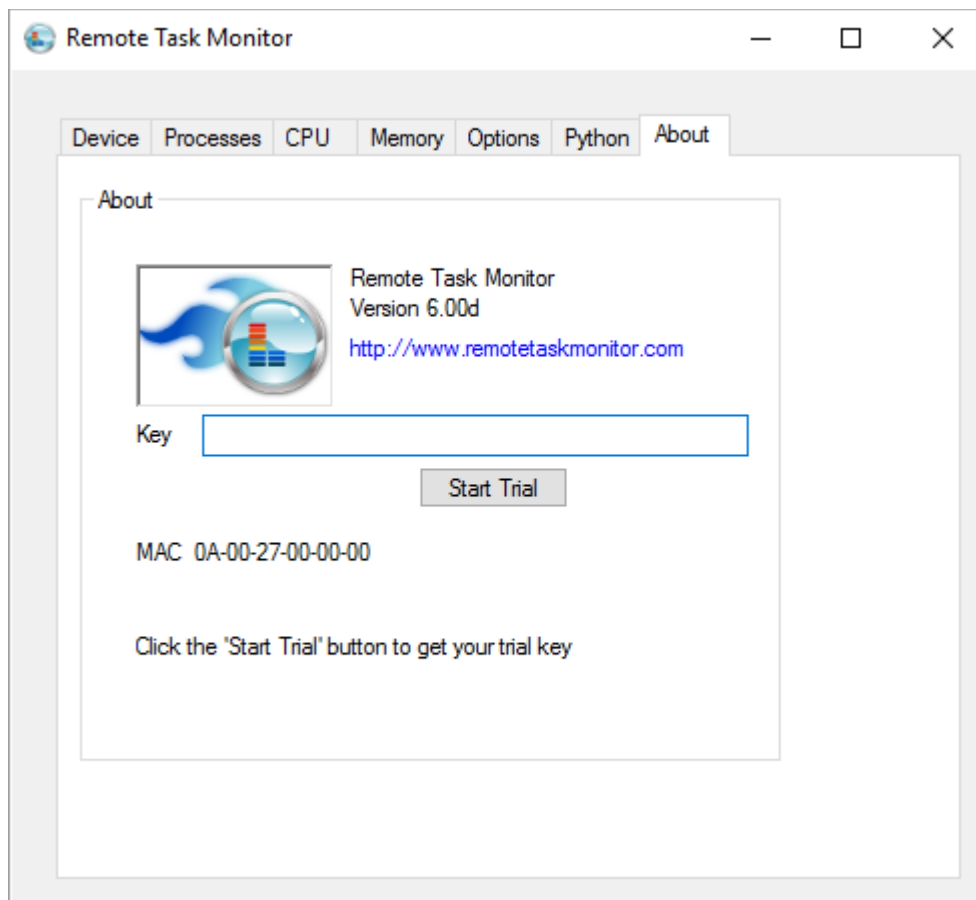

Your cemon.*.exe files are located in the wince directory of your installation.

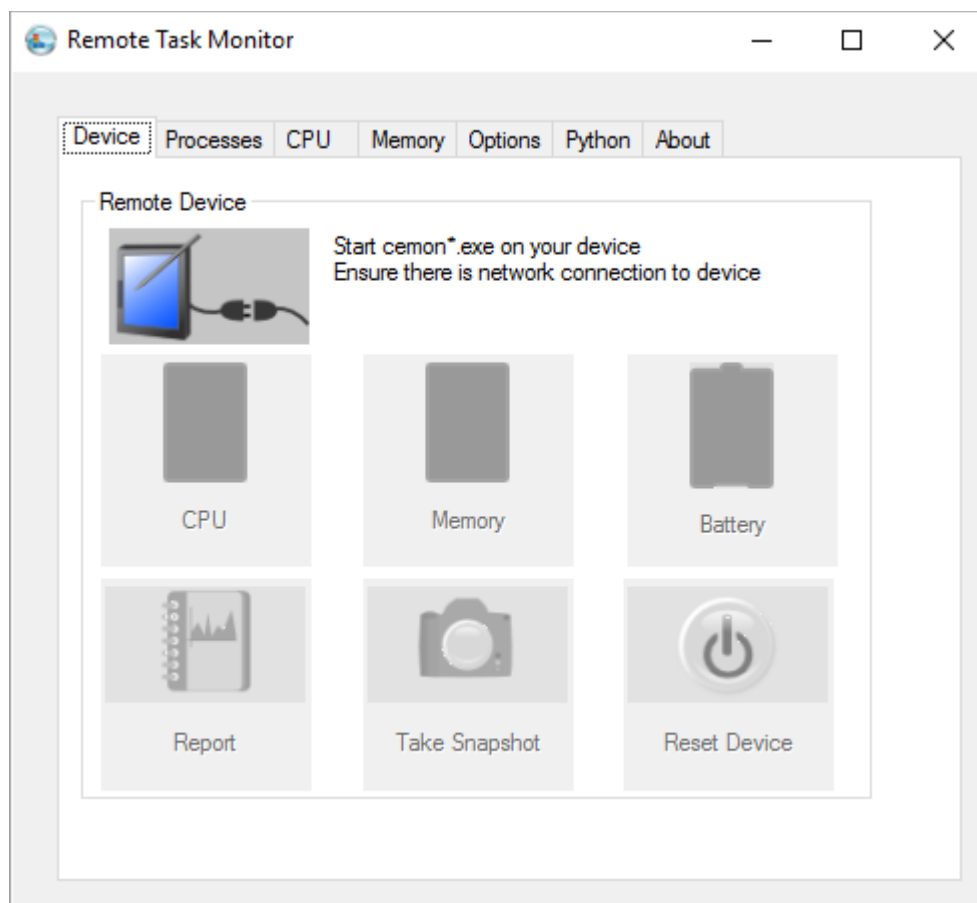

2. Run the cemon program on the device.
3. Make sure you have Ethernet or WiFi connection between your device and a Windows PC. Both should be on the same network.
4. From the Windows PC, run Remote Task Monitor:

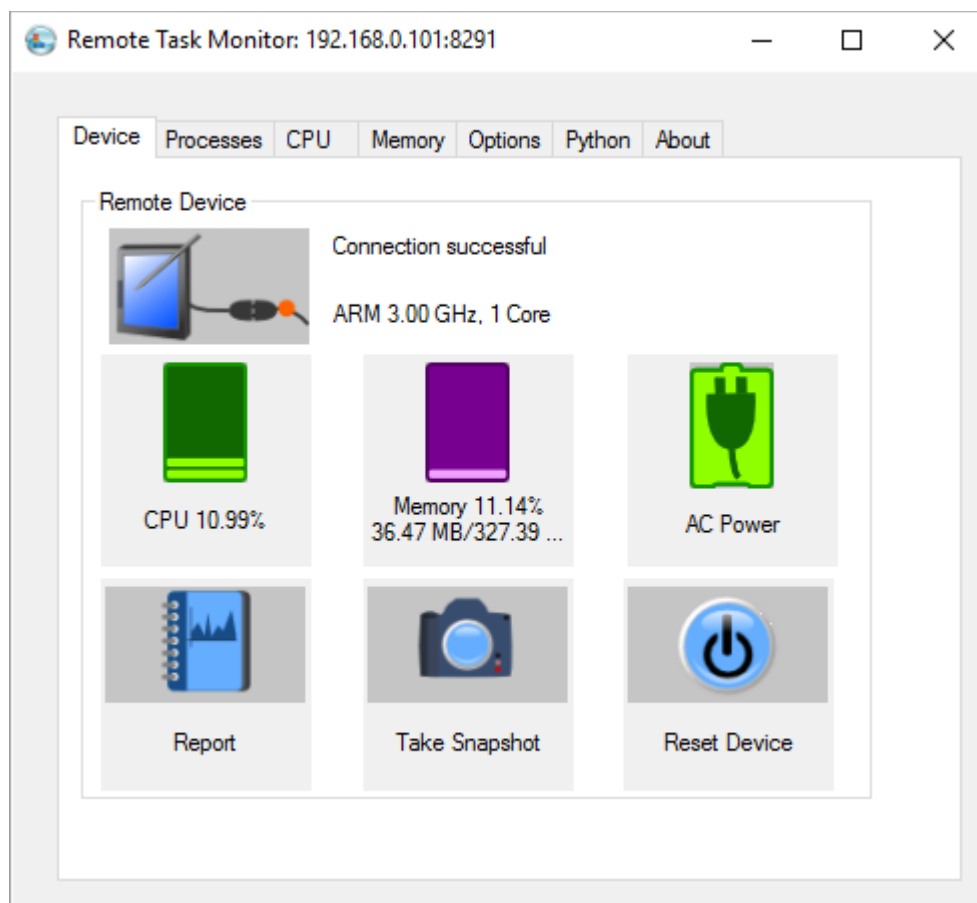

5. Copy-Paste your license key or trial key in the “Key” box:

- Click on the “Device” tab and wait a couple of seconds for a connection to establish with the device.

7. After connection is successful:

8. If connection does not establish, make sure your device and the Windows PC are on the same network. Can you:
- Ping the IP of the device from the PC?
 - Ping the IP of the PC from the device?
